

FOR CHILDREN AND TEENS

# Standing tall in the world

## Swiss Viva Junior S

The all-rounder for indoors and out. The multi-position standing power wheelchair for children and teens.

Speaking to our customers helps us to gain experience, which we draw on to develop new features and products so that we can cater to needs that change constantly throughout your life and provide you with what you need. Because choosing the right power wheelchair is an important decision. It is a constant companion that enables you to lead a self-determined, mobile and pleasant life.

We are familiar with ergonomic requirements. We know the medical indications. We ask questions and listen carefully. We design and produce our wheelchairs with technical expertise and attention to detail, always on the lookout for an even better solution.

**That's what we call craftsmanship.**

**We've been building power wheelchairs since 1965. The proven Swiss Viva Grand S for adults served as the template for developing the Swiss Viva Junior S for children and teens.**

### EXTREMELY AGILE

The all-rounder Swiss Viva Junior S keeps you mobile indoors and out. Its slim but extremely robust design and mid-wheel drive give you agility indoors. Outdoors, its clever suspension system carries you safely over challenging terrain.

### GROWS WITH YOU

You are unique and we take that literally. That's why we've constructed our standing power wheelchair in a modular way – and customize each one individually. Plus, it grows with you and adapts precisely to you and your situation with a whole series of optional features.

### GREATER FREEDOM

Whether you're in the woods, at school or a club, you and the Swiss Viva Junior S will cut a good figure wherever you go. Its appealing design and lively colour options fit in anywhere. Different standing curves enable you to achieve a good standing position and a significantly increased sphere of action.

### PACKED WITH FUNCTIONS

The building-block system of the Swiss Viva Junior S contains the best solutions from 60 years of wheelchair development. It truly is a library full of intelligent functions that really help you through your day. From the biodynamic positioning package to the electric front caster lock and fold-out control unit. Many other special controls and customisations round out the functions on offer.

# Swiss Viva Junior S
