

REAR-WHEEL OR  
MID-WHEEL DRIVE

Sit,  
stand,  
lie

### Swiss **Viva Grand S**

Your multi-position power wheelchair for greater freedom and mobility day-to-day – standing or sitting, indoors or out, with rear-wheel or mid-wheel drive.

There's no replacement for direct contact with you. Whether it's at trade shows, in rehab centres or during direct consulting. Encounters with people provide us with inspiration and motivation to produce an ever better power wheelchair. We've been working in the rehabilitation market for more than 50 years, constantly sharing ideas and experience in a network of customers, specialist dealers, therapists and doctors. This is important input that takes our team forward.

Speaking of team: We are a colourful bunch with a whole lot of ideas and knowledge. Bringing together a great deal of experience and understanding, technical expertise and solid craftsmanship. Intensive exchange with one another combined with the will to optimise products are what make the difference. This describes our manufacturing mindset, which is reflected in the quality of our products and in the many solution details.

**Do you have an impossible problem?  
Then tell us about it!**

**We have been building power wheelchairs since 1965**, constantly consulting with you in the process. **That's why the proven Swiss Viva Grand S is now available with mid-wheel drive.**

#### REACH MORE

Whether you're shopping, cooking, at a window or simply talking to people who are standing, the Swiss **Viva Grand S** standing power wheelchair enables you to reach more. Its dynamic knee pads allow you to stand effortlessly with spring-loaded action so that you can literally reach further, giving you more independence day-to-day.

#### THERAPEUTIC BENEFITS

As well as making your everyday life easier, the standing wheelchair also helps to maintain and improve your general state of health. There's the training effect for your cardiovascular system, greater breathing volume, maintaining joint mobility and preventing contractures, and much more.

#### MULTIFUNCTIONAL

Programmable standing curves and biodynamic components enable you to stand up in a way that suits your needs. All the key elements like the headrest, leg rests and seat angle move with you and follow your body with every movement. This allows you to move into an almost perfect standing position, as well as an ergonomic sitting or lying position. What's more, we use the modular design and many customizing options to tailor the Swiss **Viva Grand S** power wheelchair to suit you perfectly.

#### TAKING YOU EVERYWHERE

Smooth sailing, indoors and out: With powerful motors and independent suspension, the Swiss **Viva Grand S** power wheelchair carries you over tough outdoor terrain. And the standing power wheelchair also enables you to manoeuvre easily indoors – in your home, at work or while shopping. Modern steering elements, compact dimensions and mechanical components perfected with years of experience give you agility and lend the Swiss **Viva Grand S** real precision handling.

#### REAR-WHEEL DRIVE OR MID-WHEEL DRIVE

Our customers have spoken: Following many requests, the Swiss **Viva Grand S** is now available as mid-wheel drive. This means that the power wheelchair is now even more agile and better over tough terrain. The ideal driving gear for tight corners, steep slopes or high door sills. Plus, you sit lower – and reach up to tables.

# Swiss Viva Grand S

VERTICAL STANDING (88°)

REAR-WHEEL OR MID-WHEEL DRIVE

COMFORT POSITION (SITTING)

INCLINED STANDING (APPROX. 67°)

LYING / STANDING
