The power wheelchairs of the Swiss Viva Range – which will be yours?

There's no replacement for direct contact with you. Whether it's at trade shows, in rehab centres or during direct consultation. Encounters with people provide us with inspiration and motivation to produce an ever better power wheelchair. We've been working in the rehabilitation market for more than 50 years, constantly sharing ideas and experience in a network of customers, specialist dealers, therapists and doctors. This is important input that takes our team forward.

Speaking of team: We are a colourful bunch with a whole lot of ideas and knowledge. Bringing together a great deal of experience and understanding, technical expertise and solid craftsmanship. Intensive exchange with one another combined with the will to optimise products are what make the difference. This describes our manufacturing mindset, which is reflected in the quality of our products and in the many solution details.

Do you have an impossible problem? Then tell us about it!

We have been building power wheelchairs since 1965. Since then, we have created models **with their very own strengths**, such as the **reliable** Swiss **Viva Grand**, the **agile** Swiss **Viva Grand M** and the **compact** Swiss **Viva Plus**.

WHAT ALL VIVAS CAN DO

We always measure our power wheelchairs against what helps you day-to-day and there are five features that are particularly important to us. You'll find these in all Swiss Viva models. That said, all of our power wheelchairs have particular strengths to give you optimum support. Let's talk – we'll find just the right Viva to suit you best.

MOBILITY EVERYWHERE – INSIDE AND OUTSIDE

COMPACT EXTERNAL DIMENSIONS – FITS ANYWHERE

MODULAR CONSTRUCTION – EVERYONE IS UNIQUE

SUPER DRIVING QUALITY – AGILE AND QUICK

COMFORTABLE – ERGONOMIC DESIGN

THE EVERYDAY ALL-ROUNDER

One chair for everything – the Swiss Viva Grand unites outdoor driving pleasure with compact indoor agility. Modularly adapted to you and with a whole range of customizing options, it takes you everywhere you need to go. Built to last, its high build quality and robust construction ensure sustainability through longevity.

THE PERFECTIONIST

If you're someone who doesn't do things by halves, then the Swiss Viva Grand M is right for you. It impresses with a powerful mid-wheel drive, supreme driving gear and a low seat height. The perfect choice for anyone unwilling to compromise outdoors, in terms of agility or even when it comes to getting on a train.

THE SPACE-SAVER

Small home? Tiny lift? Narrow supermarket checkout? No problem! With the Swiss Viva Plus you can move easily through narrow spaces without compromising on functions: The Swiss Viva Plus may be small, but it has everything that our large models have: from the biodynamic positioning package and the electric height lift to the many options typical of SKS.

Swiss Viva Grand

GETS YOU MOVING

MID-WHEEL DRIVE

Swiss Viva Grand M

UNCOMPROMISINGLY COMPACT
